

RIGHT FIT

TAI MARTINEZ, TYLER EINSPAHR, KYLEE HART, JASON
ALLEN HAWK, TYLER BRAKER

Value Proposition

We recommend clothing items to shoppers by taking measurements with a body scanner.

Request to Investors

**\$100,000 for 10%
of the company**

Problem

**Finding clothes that fit
based on brand and
style.**

RightFit Step 1:

Stand on the red line and face the camera head on with arms extended outward (see visual below)

Don't Move!

Scan Countdown:

Customers

- Who: Clothing Shoppers (online and in-store)
- Retail Stores
- Get/Keep/Grow Customers
 - Adding more stores
 - New products and deals
 - Social Media and Internet
 - Advertising for stores where the tablet scanners are located

What the Customers Say (based on surveys)

- Based on 200 surveys
 - When asked “What is your first reaction to RightFit?”:
 - 32% said very positive
 - 51% said positive
 - When asked “How willing would you be to use a body scanner that shows your clothing size and recommends certain articles of clothing?”
 - 56% said definitely
 - 41% said possibly

Competition

- Downloadable applications that make recommendations based on what clothing items you like.
- Researched patents show that there is services that take body measurements but only for specific tailored made clothes.

Revenue Models

- How we will make money:
 - \$10.00 one time usage fee
 - \$5.00 subscription fee for pro-service website
 - Partnering with clothing companies to advertise for them
